WORK EXPERIENCE

Dextra Technology / Texas Instruments - *UI / UX Designer - Product Designer*

Embedded Educational Project for Texas Instruments (graphing calculators)

Sep 2017 - Jan 2019

- Designed & presented high-quality mockups for new products following a user-centered design.
- Generated assets for software development including icons, images, SVG, CSS, html5, and CSS.
- Created and maintained an up-to-date product style guide.
- Created prototypes for user experience research.
- Gave creative UI / UX solutions to optimize user satisfaction.
- Collaborated with other designers and developers advising and sharing with them the best UI / UX practices.
- Participated in innovation and research teams to develop new products.
- Led design review meetings with stakeholders.

Emba group - *UI / UX Designer*

Energy management systems for smart buildings.

Sep 2015 - Sep 2017

- Generated 3D assets of buildings and air conditioning equipment.
- Translated energy management system users' needs into user interfaces.
- Collaborated with the project manager to optimize the design process.
- Made usability testing for feedback purposes.

LOSHS - UI / UX Designer

Mexican government tax system

Apr 2014 - Apr 2015

- Built high fidelity mockups and prototypes for new client proposals.
- Collaborated with front-end developers to build reusable components.
- Tested the product to evaluate the interface usability.

Sanoh Industrial Co., Ltd - Design Engineer

Product design engineering

Oct 2013 – Mar 2014

- Read Japanese technical product drawings (AutoCAD files) and translate them into a Bill Of Material document in English and Spanish.
